## SAFETY IN THE WILDERNESS

It is important that travelers with Northern Alaska Tour Company understand that Alaska's Arctic is a truly remote wilderness region. Traveling through vast wilderness stretches requires adequate time and preparation. Weather or mechanical factors, albeit infrequent, can result in multi-hour delays. Medical facilities are limited. Limited communication and transportation infrastructure inherently cause evacuation for illness or other emergency situations to take, at the very best, several hours to conduct. For this reason, travelers to this region should be of reasonable health and physical condition.

Northern Alaska Tour Company is an Alaskan-owned tour operator based in Fairbanks, Alaska.

The company was founded in 1987 to provide unparalleled travel and touring experiences in Alaska's Arctic for guests while maintaining the highest standards of safety and commitment to traditional culture and the environment.

Our cooperative, grassroots tour programs strengthen the local economies in the communities and regions we visit and help preserve the wisdom of knowledgeable locals by recording and incorporating their knowledge into tour programs.

As our traveling guests learn of and experience firsthand the delicate, wondrous environment of Alaska's Arctic, they are able to appreciate and help protect it. When carried forth conscientiously, travel and touring can serve to protect the natural environment and preserve traditional culture where it might otherwise be destroyed.

In sharing our culture and environment with visitors, we as hosts, along with our guests are deeply enriched by the experience.....which is really what travel and touring is all about.

### GUEST SAFETY

Guest safety is our foremost priority. Guides are licensed to operate commercial vehicles. Tour vehicles are CB radio and satellite phone equipped. Weather conditions always dictate safe flight altitude. At times it is necessary to fly above cloud cover, thus reducing or even eliminating aerial visibility.

### WHAT TO WEAR / BRING

Layers are the key to comfort. While large parkas and snow suits aren't necessary, they do help. Whether or not you are lacking in heavy snow gear, layers can make winter comfortable. Start with snug fitting long/thermal underwear. On top of that you will want an assortment of undershirts, T-shirts, long sleeved shirts, sweaters, fleece vests and or jackets, and a wind-proof shell. For the bottom-half try to have snug fitting warm pants, sweat pants, and finish with wind-proof pants. Sock liners and wool or wool blend socks plus the warmest boots you can find will keep your toes warm. It is important to remember that the only wind proof layer you want is the outer one. Keep the inside layers breathable and shy away from cotton. Also try to use layers that go from snug to loose. To finish-off your winter wear bring a hat(s), scarf and mittens.

### FLIGHT WEIGHT

At the time of reservation, please provide the individual weight of each member of the tour party. The weight is required for proper balance of aircraft used for the flight portion of the tour.  
**WEIGHT LIMIT:** Baggage is limited to 10-15 pounds per person. Luggage over 15 pounds is subject to be stored in Fairbanks.

### RESTROOMS

Outhouses are the norm for the Dalton Highway. Frequent rest stops are made along the tour route. The longest time period between stops is approximately 2 1/2 hours.

In the spirit of the remote wilderness, the overnight accommodations consist of very basic, clean rooms that are extremely rustic by urban standards. There are private toilet and shower stalls in each room. Pay telephones are available.

### INCLUSIONS

The tour price includes guided ground tour, air transportation, Aurora watching in Wiseman, and a room for one night at Coldfoot Camp. Guests may bring their own snacks/food or purchase a meal at Coldfoot.

If the tour requires additional overnight stay due to weather or uncontrollable circumstances the cost of accommodations and meals is the guest's responsibility.

If the weather requires us to alter the return method of travel from air to ground it will be done as an equal exchange of travel.
